EDUCATION

University of Waterloo

September 2025 – May 2030

Bachelor of Applied Science in Computer Engineering

Waterloo, ON

Relevant Coursework: Programming Fundamentals (C++), Project Studio

TECHNICAL SKILLS

Languages: JavaScript, C++, Python, TypeScript, PostgreSQL, SQLite, HTML/CSS

Frameworks: React, Next.js, Node.js

Tools: Git, GitHub, Google Cloud Platform (GCP), Vercel, VS Code

EXPERIENCE

Software Developer Intern

January 2026 – April 2026

Port 443

Burlington, ON

- Contributed to software development projects, including implementing new features and resolving bugs to ensure high-quality deliverables
- Developed and executed unit tests to improve code reliability and maintainability
- Actively participated in Agile development teams, collaborating on sprint planning, code reviews, and continuous integration efforts

Autonomy Team Member

September 2025 – Present

Waterloo Aerial Robotics Group

Waterloo, ON

- Building an HSV color-detection pipeline in OpenCV to identify colored objects under variable lighting
- Using Git/GitHub workflows for version control and code reviews
- Contributed to a multi-process ground station in Python, implementing MAVLink communication and heartbeat monitoring for drone reliability

PROJECTS

Coordinate (Full Stack) | *React, TypeScript, Next.js, PostgreSQL, Google OAuth, Git*

June 2025 – Present

- Developed a full-stack web application deployed with Vercel for a Slovak non-profit dance team
- Implemented Google OAuth and NextAuth.js to enable secure login and personalized schedules
- Designed a normalized database in PostgreSQL for users, events, and attendance tracking
- Built a responsive frontend with React and Tailwind, including weekly calendar view and attendance tracking
- Reduced scheduling conflicts by 40%, improving team attendance

BudgetQuest (Mobile App) | *React Native, TypeScript, Expo, SQLite*

September 2025 – Present

- Built an offline mobile game to teach students financial literacy
- Coordinated a four-person team to assign tasks through GitHub and conducted weekly meetings for debugging
- Used Expo SQLite to persist game state and player progress
- Developed dynamic UI components, including progress bars and automated weekly reports with NativeWind and JavaScript

Bedside Physical Assistant | *C, C++, Arduino*

September 2025 – December 2025

- Designed an Arduino UNO R4-based assistant to prevent hospital delirium through gamified physical exercises
- Collaborated in a team of four to plan, prototype, and test the system's hardware and software integration
- Integrated multiple sensors and modules, including an accelerometer (fall detection), a pulse oximeter (heart-rate monitoring), and a sound sensor + microphone (voice check-ins)

LEADERSHIP & INVOLVEMENT

HealthIsWealth

October 2024

Mohawk College HealthHacks

Hamilton, ON

- Developed a Python-based screen time app with a graphical interface to promote mental well-being
- Led a team of three at the Mohawk HealthHacks Hackathon in under 24 hours; placed runner-up
- Pitched to health professionals and demonstrated potential to reduce overall user screen-time by 30%
